Description

Star Atlas is a massively-multiplayer online metaverse. In the distant future, three galactic factions have emerged, in an ongoing struggle for resources, territorial conquest, and political domination. Players can join a faction, directly influence the course of the metaverse, and earn real-world income for their contributions.

The game itself is interesting, playing it I began to easily walk over 10 km, but in terms of earnings, it is unprofitable due to the actions of the developers

That's a big trouble for those who bought sneakers too late, but it's was great for those who bought sneakers in the start of project. But especialy I never played the game))

Like any self-respecting project, Stepn sneakers have their own website stepn.com, the domain of which was created back in 2004, but the project itself appeared only at the end of 2021, and started working at the beginning of 2022. This is indicated by new factors, and scammers do not hide it even on the site. It's all lovely, but I never played it)))) it's a shame))

Flew in April 2022. Bought a sneaker for \$1,500. Now it's worth \$50. But I'm not discouraged, I keep going because I believe in the project no matter what. And walking in the fresh air is very useful.

I got into this game on a big hype, invested \$ 1,500 in it. At first, I was delighted that it was good for health, plus you're not making bad money yet and you get your investment back in a month and a half, but as everything started to fall sharply, I got out of it. But now I think they will come back, since everything is very cheap now. In terms of improving health, a wonderful game, but in terms of investment, you need to think and count everything!!!

I lost \$2,500 on Stepn, a sad story, but the game itself is funny and generally has a positive effect on the world, makes people healthier and less rich 😂😂😂
